# Schools Health Education Unit Survey 2009/2010

This set of tables is the first publication of the SHEU survey results of children and young people in secondary schools, as collected during Spring term 2010. For each question in the SHEU survey, a table is provided with answers as a percentage of respondents from across Essex.

The Table of Contents shows the different questions grouped by theme which should help you to identify which results are most interesting for you.

Over the coming months the Commissioning Analysis team in Schools, Children & Families will produce further analysis showing results at a District level, and where possible, trends over the past 3 years. This analysis will also be published on the partnership portal <http://www.essexpartnershipportal.org>.

For more information on the SHEU survey follow [this](#) link.

For further questions please contact us via the Essex Children's Trust on [childrenstrust@essex.gov.uk](mailto:childrenstrust@essex.gov.uk) or phone on **01245 431344**.

Below where a note is made that the table is based on the "total sample", this refers to the number of cases submitted for analysis by the software.  
The actual number of cases available for analysis for a given question may be less than this; a count of the "valid responses" for each question is given where possible, and if not a note will be made.

If the sample for a particular group is small, the number of percentage points represented by a single pupil will be relatively high.
