POPULATION 169,800

Mid-2007 population estimate

Source: National Statistics website: www.statistics.gov.uk

Basildon at a glance

- The health of the population in Basildon is generally close to the England average. However, fewer people claim incapacity benefit for mental illness, there are fewer alcohol related hospital stays and there is less drug misuse in Basildon than the England average. Since last year, homelessness has become significantly worse than in England; meanwhile adult physical activity levels have improved and are now similar to the average.
- There are health inequalities in Basildon by location, gender, deprivation and ethnicity. For example, men from the least deprived areas can expect to live 8 years longer than those in the most deprived areas.
- Deaths from all causes and from heart disease and stroke have closely tracked the national trend. But the rate of early death from cancer has not kept pace and is now worse than the England average.
- In Basildon, significantly more children than in England live in poverty, children's GCSE achievements are worse and they are less physically active.
- A relatively high proportion of the population are at increased risk of poor health due to smoking, obesity or poor diet.
- The annual report of the Director of Public Health for South West Essex PCT provides further detail on the health of this area and is available at www.swessexpct.nhs.uk ; for more up to date lifestyle data please refer to www.erpho.org.uk/lsr/

Deprivation

This chart shows the proportion of residents within England, the region and the local authority living in neighbourhoods belonging to each of the five national deprivation quintiles. These quintiles were derived by arranging all the small areas (Lower Super Output Areas) in England in rank order according to the deprivation scores in the Index of Multiple Deprivation 2007 and dividing them into five equal groupings. The resident numbers are based on the 2005 population figures.

- 1 - least deprived quintile
- 2
- 3
- 4
- 5 - most deprived quintile

Quintile	Residents %	Residents Number
1	25.4	42,651
2	12.6	21,183
3	14.8	24,861
4	28.4	47,646
5	18.8	31,614
All	100.0	167,955

Basildon

Health inequalities: life expectancy

This chart shows the life expectancy at birth for males and females (2003-2007) within the local authority by national deprivation quintiles. Note the figures in this chart are based on data for five years. The life expectancy figures presented in the health summary chart are based on data for three years.

- 1 - least deprived quintile
- 2
- 3
- 4
- 5 - most deprived quintile

Quintile	Male Years	Female Years
1	81.1	83.5
2	78.8	84.3
3	78.5	81.0
4	76.7	80.3
5	72.9	78.7
All	77.6	81.2

Basildon

Where the total male or female population (2003-2007) is less than 5,000 the life expectancy figures are not shown (n/a).

95% confidence interval. These indicate the level of uncertainty about each value on the graph. Longer/wider intervals mean more uncertainty.

Health inequalities: changes over time

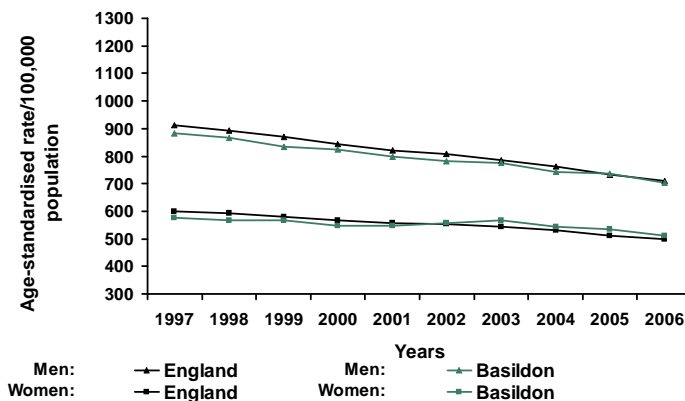

These trend graphs show how changes in health for this local authority compare with changes for the whole of England. Data points are mid-points of 3 year moving averages of annual rates e.g. 1997 represents the 3 year period 1996-98.

Trend 1 compares death rates (at all ages and from all causes) in this local authority with those for England.

Trend 2 compares rates of early death from heart disease and stroke (in people under 75) in this local authority with those for England.

Trend 3 compares rates of early death from cancer (in people under 75) in this local authority with those for England.

Trend 1: All age, all cause mortality

Trend 3: Early death rates from cancer

Health inequalities: ethnicity

This chart compares the percentage of children in each ethnic group who are eligible for free school meals (2008). Eligibility for free school meals is an indicator of deprivation, and people who suffer more deprivation tend to have poorer health. Comparing deprivation by ethnic group helps identify potential health inequalities between the groups.

Legend:
■ England
■ Basildon

Ethnic Groups	% eligible	Number eligible
White	13.2	2,850
Mixed	18.3	110
Asian	7.7	30
Black	9.1	60
Chinese/other	9.5	20

All numbers are rounded to the nearest 10. Where the total school population in an ethnic group in the local authority is less than 30, or the number eligible is less than 5, the table shows n/a.

Health summary for Basildon

The chart below shows how people's health in this local authority compares to the rest of England. The local result for each indicator is shown as a circle, against the range of results for England which is shown as a bar. A green circle may still indicate an important public health problem.

- Significantly worse than England average
- Not significantly different from England average
- Significantly better than England average
- No significance can be calculated
